

Revision of the *Standards for Educational and Psychological Testing* Joint Committee Co-Chair Selection

The Management Committee of the *Standards for Educational and Psychological Testing* (the *Standards*) and its sponsoring organizations – the American Educational Research Association (AERA), the American Psychological Association (APA) and the National Council on Measurement in Education (NCME) – are proud to announce the selection of the co-chairs of the Joint Committee, charged with leading the process of revising the 2014 edition.

Andres (Andy) De Los Reyes is a Professor in the Department of Psychology at the University of Maryland. Dr. De Los Reyes is past chair of APA's Board of Educational Affairs (BEA), current Editor-in-Chief of the *Journal of Clinical and Child Adolescent Psychology*, and a longstanding member of APA. His expertise is in psychometrics and clinical assessment of diverse populations in developmental and mental health contexts. He received his PhD in Clinical Science from Yale University.

Ye Tong is the Senior Vice President of Assessment Operations at the National Board of Medical Examiners, past president of NCME, longstanding member of NCME and AERA, and a founding member of Women in Measurement. Dr. Tong is a national recognized expert in measurement, with publications and presentations in areas such as equity in assessment, equating, computer adaptive testing, and educational policy. She received her PhD in Educational Measurement and Statistics from the University of Iowa.

The Management Committee is grateful for all the talented applicants who expressed interest in these positions. The selection process incorporated member input from all sponsoring organizations that informed the thorough set of selection criteria that was applied.

Moving forward, we will work with Drs. Tong and De Los Reyes to select Joint Committee members. The Joint Committee will then engage in a multi-stage revision process, one that will ultimately make the revised *Standards* more timely, relevant, accessible, and therefore useful in today's context of educational and psychological testing. We look forward to updating you with these continued efforts.

Sincerely,
Standards Management Committee
Michael Rodriguez (AERA)
Fred Oswald (APA)
Kristen Huff (NCME)
